Kanban Coaching Professional Masterclass

This masterclass with David J Anderson is an interactive, collaborative course designed to facilitate knowledge sharing and learning. Achieve the educational requirements for the Kanban Coaching Professional designation from LeanKanban University.

The focus is on shared experiences and discussions about the hard questions that clients and team members ask coaches during the introduction of Lean ideas through the use of a Kanban pull system. Attendees will have the opportunity to network with a group of peers experienced in Kanban and who actively lead or coach Kanban initiatives.

The goal of this course is to enable participants to go back into the field and successfully coach transitions using the Kanban Method. The open and flexible format of the program will be adjusted and tailored to the specific needs of the attendees.

Kanban is a low resistance facilitator of evolutionary change that accelerates organizational maturity.

“By the end of the workshop, I was much more confident in my ability to assist clients in implementing the Kanban method in their organizations.”
Masterclass Agenda

Day 1: Models for understanding common reasons for resistance to change, how to avoid that resistance, and how to mitigate, manage and coach change in the face of this resistance.

Day 2: Advanced kanban system design, and the Systems Thinking Approach to Introducing Kanban (STATIK)

Day 3: Case study review and analysis. See how kanban is working around the world and understand what works.

Day 4: Qualitative risk analysis, including exercises to explore risk taxonomies. Also, upstream Kanban and the role of the product manager. Explore how Kanban helps decisions and commitments.

Be a KCP | Kanban Coaching Professional

Take this class and be eligible to apply for the Lean Kanban University Kanban Coaching Professional designation. Other requirements apply.

This class is limited to a maximum of 12 attendees.

All attendees will receive an early invitation to Kanban Leadership Retreat events.
